

"Welcome, coding champion! 🚀 We're thrilled to have you embark on this coding challenge. Your skills are about to shine, and we can't wait to see the incredible solutions you'll craft. Best of luck, and happy coding! 💻 ✨ #CodeOn"

Coding Challenge

1. Implement a simple React application that fetches and displays a list of posts from this API (Posts: <https://jsonplaceholder.typicode.com/posts>).

Display the post title followed by the username from this API (Users: <https://jsonplaceholder.typicode.com/users>).

e.g.

sunt aut facere repellat provident occaecati excepturi optio reprehenderit By Bret

2. Include a button or a link next to each post to toggle the visibility of additional details, such as post body, number of comments and user email. (Comments API: <https://jsonplaceholder.typicode.com/comments>)

e.g.

sunt aut facere repellat provident occaecati excepturi optio reprehenderit By Bret | See more ...

Clicking on "See more ..." would show:

quia et suscipit suscipit recusandae consequuntur expedita et cum reprehenderit molestiae ut ut quas totam nostrum rerum est autem sunt rem eveniet architecto.
Comment: 5 | Contact: Sincere@april.biz

Important

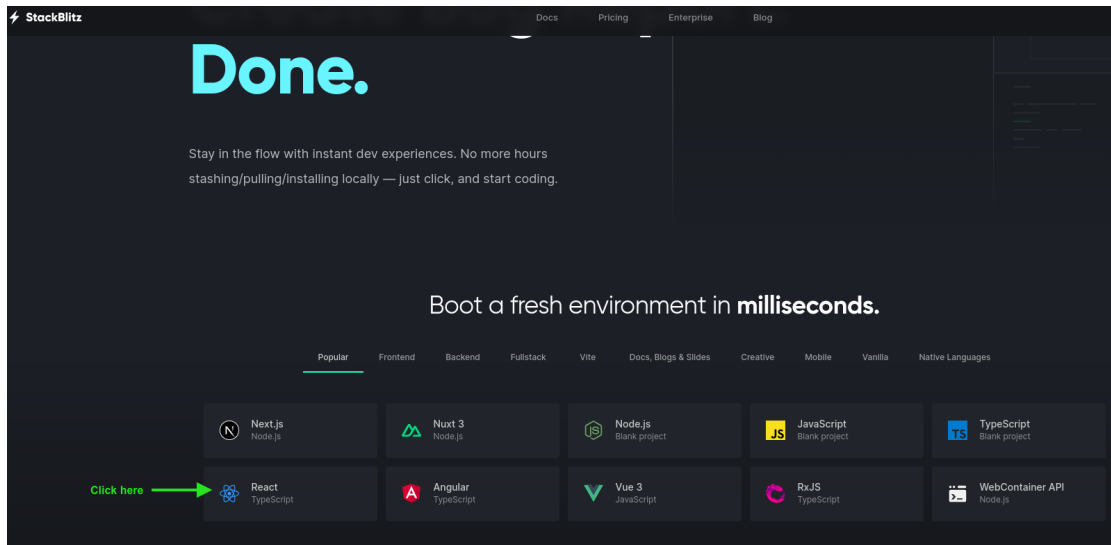

When implementing, take into account guaranteeing performance.

API documentation

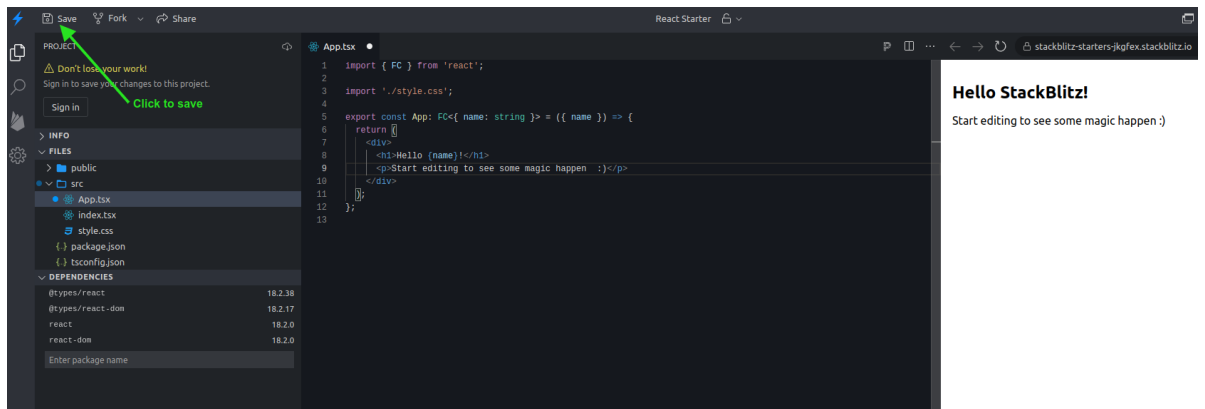

<https://jsonplaceholder.typicode.com/guide/>

Guide to deliver

1. Go to <https://stackblitz.com/>
2. Click on react

3. Once you implement your awesome solution, click save

4. When you save your project just copy the URL and send it to our HR team.

✨ Thanks a lot for being part of this
